

### Treatment of punctuation

- “Missing” punctuation (the period)
- Hyphen: hyphenated across line break?
- Hyphen different from Dash -- encode how?
- Other?

Abbreviation (as appears in text) and Expansion (silently by encoder)? A/c?

Should we look at <w> for when we want to do @rend stuff that doesn't fit <hi>?

### Attribute: @rend(ition)

- Emphasis or technical (check other items and make decisions)
- Underline
  - <hi rend="underline">Crypt</hi>
- Double underline
  - <hi rend="double\_underline">10 vols</hi>
- Flourish
  - <hi rend="flourish">L</hi>
- Strikethrough
  - <hi rend="strikethrough">7500</hi>
- Large (large text)
  - <hi rend="large">
- Centered text
  - <hi rend="align(center)">
- Multiple attributes (separated by whitespace)
  - <hi rend="align(center) strikethrough"></hi>
- Pencil
  - <add rend="pencil">8000</add>
- Quoted
  - <hi rend="quoted">
    - Vs <q> vs <quote> ?
- Print (writing) ?
  - <hi rend="print">ABCDE</hi>

### Tag: <pb>

- n refers to file number
- ??? refers to written number
- <pb n="49" />
- Sarah mentioned splitting up **physical** pagination numbers versus **in-text** pagination
  - Using <pb> versus <fw>

Attribute: @type for <name>

- Person
  - `<name type="pers">Townsend</name>`
- Organization
  - `<name type="org"></name>`

Tag: `<choice>`

```
<choice>
  <abbr>A/C</abbr>
  <expan>Accounting</expan>
</choice>
```

For 19th Century English

```
<choice>
  <orig>untill</orig>
  <reg>until</reg>
</choice>
```

### **Dittos**

First instance of word: `<w xml:id="d123">Foolscap</w>`

Repeated word ("): `<w sameAs="#d123">"</w>`

Lists?

```
<list>
<label>X</label><item>Item</item>
</list>
```

Tables?

@reason -- for `<unclear>`?
